

OmniMOBILE

Android solution for mobile sales

Omni Mobile is an Android app whose main goals are improvement of selling and positioning the goods on the market.

Quickly, easily and efficiently Omni Mobile enables field salesmen to plan their customer visits, create orders, gather information regarding customers, sales, goods and its position at the point of sale just by using their smart phone or tablet. Collected data is stored in the business information system of the company.

Omni Mobile can be linked to any business program of newer generations such as Datalab Pantheon, Microsoft NAV, SAP and similar.

- Improved accuracy of creating orders
- Improved payment and decrease of unpaid invoices
- Better communication between headquarters and field salesmen
- Better access to information about customers and goods
- Data sync with different business information systems
- Higher visibility of missed sales
- Greater customer satisfaction
- 100% without paper and phone calls
- Modern design

Omnisoft is a company with a longtime experience in implementation of business information solutions. Beside ERP information solutions we successfully develop and implement vertical solution which give our partners additional benefits in using software. Also, we develop specialized solutions tailor made for our clients' needs which we design together.

Our vision is to produce constant market advantage for our clients and partners providing them with solutions and services which have more value than others.
