

## WHO ARE WE?

Omnisoft d.o.o. is a system integrator company focused on the implementation of information technology products and services. The company is located in Belgrade, Republic of Serbia and actively performs projects in Serbia and the region. Our customers come from Serbia, Montenegro, Croatia, Slovenia, Macedonia, Albania, Bulgaria and Bosnia and Herzegovina.

Omnisoft is able to respond to the most complicated client requests and help them achieve their goals by using modern and efficient IT technologies.

Since its establishment in 2011, Omnisoft insists on the quality of services and on the development of its own solutions to support existing and new customers.

The certificate of our quality is our reference list.

## HOW CAN WE HELP YOU?

First of all, we implement business information programs as well as vertical solutions directly related to the information program.

### OmniWMS – Warehouse management system

- Warehouse management system that consists of desktop application and portable (PDT) devices designed to optimize and accelerate the reception, issuing, and movement of goods through the warehouse.

### OmniMOBILE – Android solution for mobile sales

- Quickly, easily and efficiently Omni Mobile enables field salesmen to plan their customer visits, create orders, gather information regarding customers, sales, goods and its position at the point of sale just by using their smart phone or tablet.

### SMS and Viber solutions

- We connect existing IT solutions with SMS and Viber platforms

### Solutions to support manufacture

- Tracking traceability of production
- Monitoring machine operations
- Keeping track of time spent on time sheets

### Solutions to support personnel records and travel orders

- Automating sending and approving of travel order requests
- Keeping track of travel expenses
- Keeping track of personnel records

### Data exchange solutions

- Solutions for data exchange between different platforms and applications
- CRM, B2B, B2C, EDI, D-Logic, OpenBravo

### Solutions to support the operation of the service

- Application for monitoring the flow of service operation

### Solutions for monitoring project tasks

- Solutions for monitoring project tasks and optimizing resources

These are just some of the examples of solutions we provided to our customers!

## NOW IS THE RIGHT TIME TO:

- Identify parts of your business that need to be automated, accelerated or made better for customers and for you
- Define together IT projects and the impact they may have on your business
- Implement solutions and help you reach new goals
